

Tension Decks

- ▶ Tension Decks are used in abrasive and blinding prone screening applications
- ▶ Screen panels are reinforced with steel wire ropes and steel reinforcements to support the perforated area.
- ▶ Wide range of shapes and sizes of aperture
- ▶ To avoid blinding apertures openings are tapered.
- ▶ The deck panels are manufactured in Polyurethane for normal hardness as well as in soft variety of rubber.

Steel wire Reinforcement

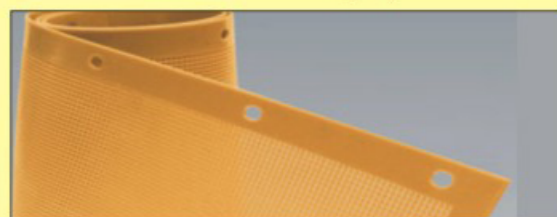

Dual hardness

Thin Flat Screen Panels

- ▶ Manufactured in Rubber and Polyurethane without steel reinforcement.
- ▶ Apertures are molded or punched as per the application
- ▶ Panels are also available with fabric reinforcement
- ▶ Used in Flipflop screens used for screening of fines and those materials with high moisture content.

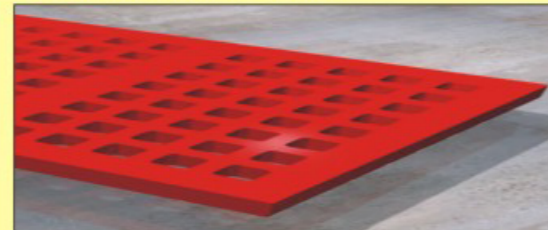

Flexible Screen Panel for Flip Flop Screen

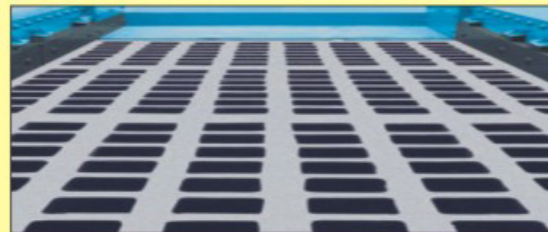

2mm flexible Screen Panels for Flip Flop Screen

Flat Deck

- ▶ Flat Polyurethane and Rubber deck in different hardness depending on the application
- ▶ Screen Panels are reinforced with a fabricated frame or perforated plate
- ▶ Additional reinforcement is also available for self supporting panels
- ▶ Wide range of shapes and sizes of aperture
- ▶ Panels are also designed as per the application requirement
- ▶ No modifications required in the supporting structure to install the screen
